IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant : Kohsuke Kino et al.   Art Unit : 1644

Serial No. : 09/202,464   Examiner : Ronald B. Schwadron

Filed : December 14, 1998

Title : T-CELL EPITOPE PEPTIDES

Commissioner for Patents
Washington, D.C. 20231

SUPPLEMENTAL PRELIMINARY AMENDMENT

Responsive to the Office Action of September 21, 2000, Applicants enclose herewith a computer readable form and a hard copy of a Sequence Listing for the instant application. Kindly substitute the hard copy of the Sequence Listing presently in the application with the enclosed hard copy of the Sequence Listing. Both the enclosed hard copy and computer readable form of the Sequence Listing differ from the hard copy of the Sequence Listing presently in the application only in formatting and the number of amino acids in the peptide with SEQ ID NO:88. While it is clear from the amino acid sequence itself that the peptide contains 14 amino acids, the hard copy of the Sequence Listing presently in the application, by inadvertent error, states that it contains 20 amino acids. This error has been corrected in the enclosed computer readable form and hard copy of a Sequence Listing. No new matter has been added.
